Daffa Fikri Fahresi

I am detail-oriented Software Engineer with more than 2 year of experience in developing, and deploying scalable web applications. Proficient in full-stack development using JavaScript, Python with a strong focus on delivering user-friendly, high-quality solutions. Adapt at collaborating in Agile, Prototype methodology environments,

I always optimizing performance, and implementing API services to support business objectives. Passionate about leveraging problem-solving skills and clean code practices to build innovative, secure systems.

Biodata

Date of Birth
- 19 June, 2002

Gender
- Male

Address
- Baru village, G2.2O, Pondok Cabe Cottage, Pamulang, South Tangerang

Religion
- Islam

Marital Status
- Unmarried

Height/Weight
- 173 / 54

Nationality
- Indonesia

Language
- Indonesian
- English (Proficient)

Education

Pamulang University - South Tangerang
Informatic Engineering
2022 - Now

SMK Darussalam - Ciputat
Computer and Network Engineering
2017 - 2020

Experience

Junior Freelance Backend Developer
PT. Vascomm Splusi Teknologi
Jul *2025 — Jan 2026*
- Enhancing and maintaining their backend services of Smart Residence, ensuring reliable data processing and control resulting in improved data retrieval performance.

Junior Software Developer - Intern
PT. Nawastra Teknologi Himpuna
Mar *2024 — Oct 2024*
- Contributed to the development, enhancement, and maintenance of three scalable enterprise web applications used for financial monitoring, loan management, and operational reporting across government institutions.

Fullstack Web Developer - Freelance
2023 — Now
- Built and deployed fullstack app interfaces using React.JS and TypeScript, ensuring cross-browser compatibility, well-optimized and accessibility compliance.

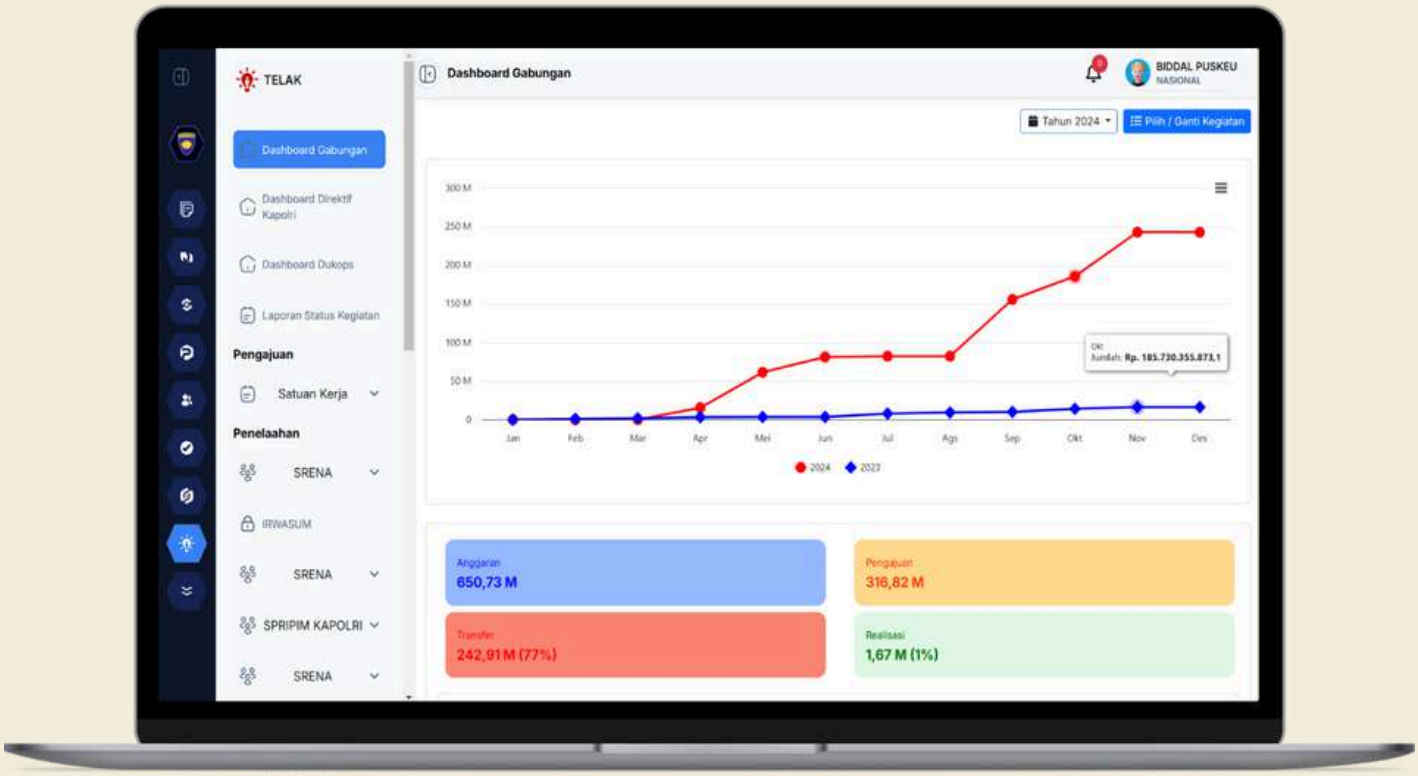
Work Project

TELAK 3.0 - Pusat Keuangan Polri (PusKeu)

PT. Nawastra Teknologi Himpuna



Web Application for Contingency Sector, Submission and Management of Activities for certain Indonesian Police Work Units

Key of Contributions :

- Migrated the frontend architecture from Bootstrap to Tailwind CSS, resulting in cleaner component structures and faster UI development.
- Refactored and enhanced legacy features while implementing new functionalities derived from Scrum sprint outcomes.
- Reduced UI-related bugs and improved maintainability through continuous maintenance and structured refactoring.
- Supported ongoing feature development while ensuring backward compatibility and minimal disruption to users.

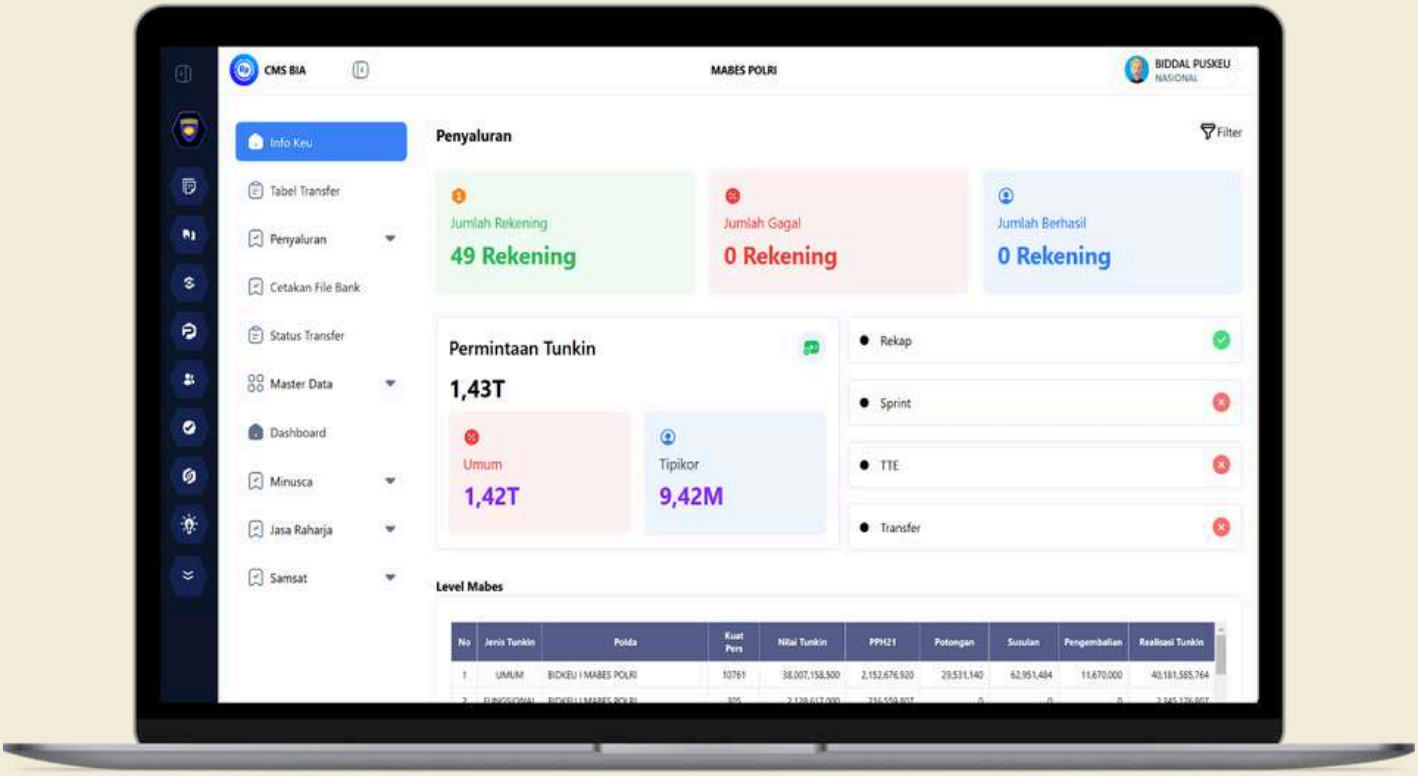
Tech Stack :

- Python, Django, Javascript, JQuery, Tailwindcss, Oracle DB

Work Project

BIA 3.0 - Pusat Keuangan Polri (PusKeu)

PT. Nawastra Teknologi Himpuna



Web Application for the internal financial management and monitoring system used to manage fund distribution, transaction status, and financial reporting administration from APBN and Non-APBN

Key of Contributions :

- Enhanced existing features by extending legacy functionalities and introducing new features and UI improvements derived.
- Implemented UI enhancements to improve data visualization, readability, and workflow efficiency across dashboard modules.
- Performed ongoing system maintenance and bug fixing to ensure application stability, reliability, and smooth operation in production environments.
- Collaborated with cross-functional teams to align feature development with evolving business and operational requirements.

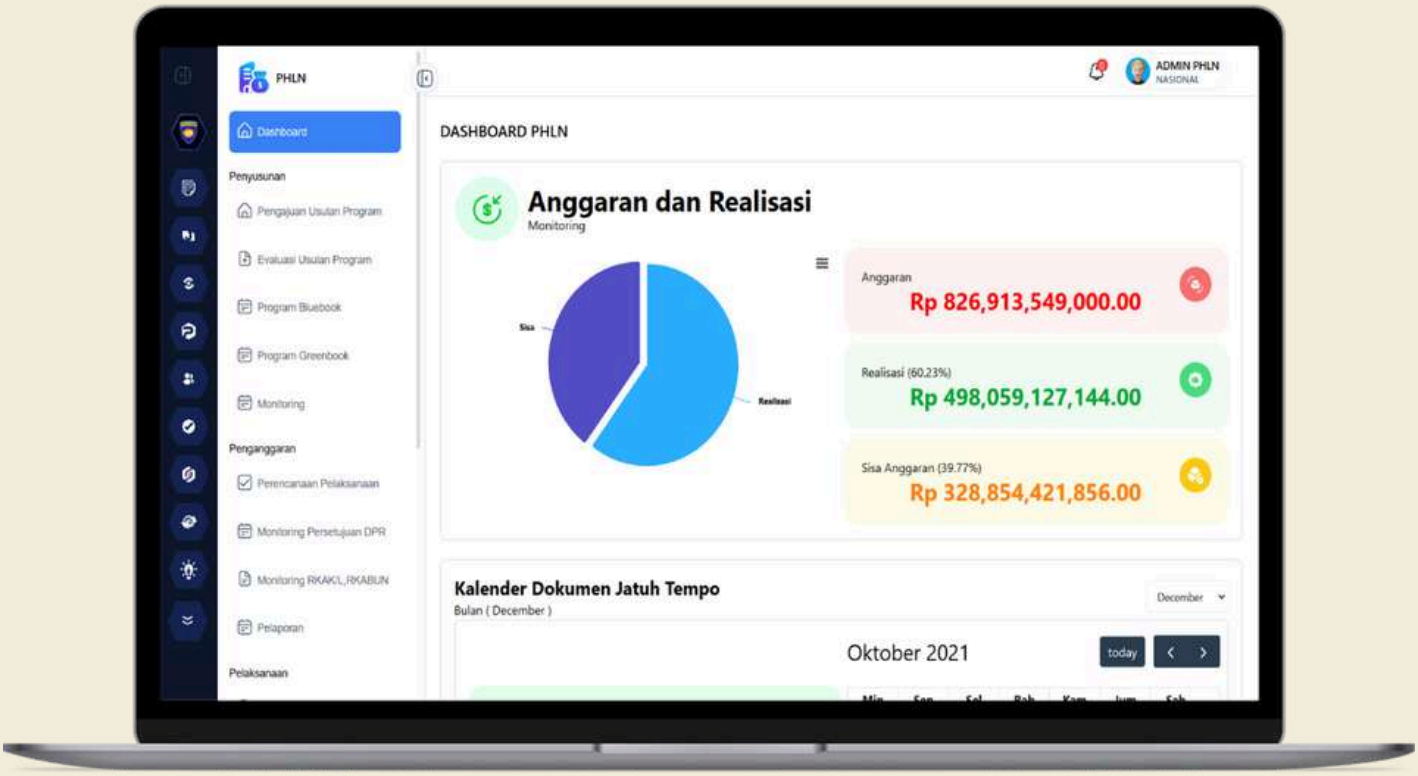
Tech Stack :

- Python, Django, Javascript, JQuery, Tailwindcss, Oracle DB

Work Project

PHLN 3.0 - Pusat Keuangan Polri (PusKeu)

PT. Nawastra Teknologi Himpuna



Web Application internal system used for managing domestic and foreign loans with monitoring fund allocation and utilization through comprehensive dashboard

Key of Contributions :

- Enhanced existing features by extending legacy functionalities and introducing new features and UI improvements derived.
- Implemented UI enhancements to improve data visualization, readability, and workflow efficiency across dashboard modules.
- Performed ongoing system maintenance and bug fixing to ensure application stability, reliability, and smooth operation in production environments.
- Collaborated with cross-functional teams to align feature development with evolving business and operational requirements.

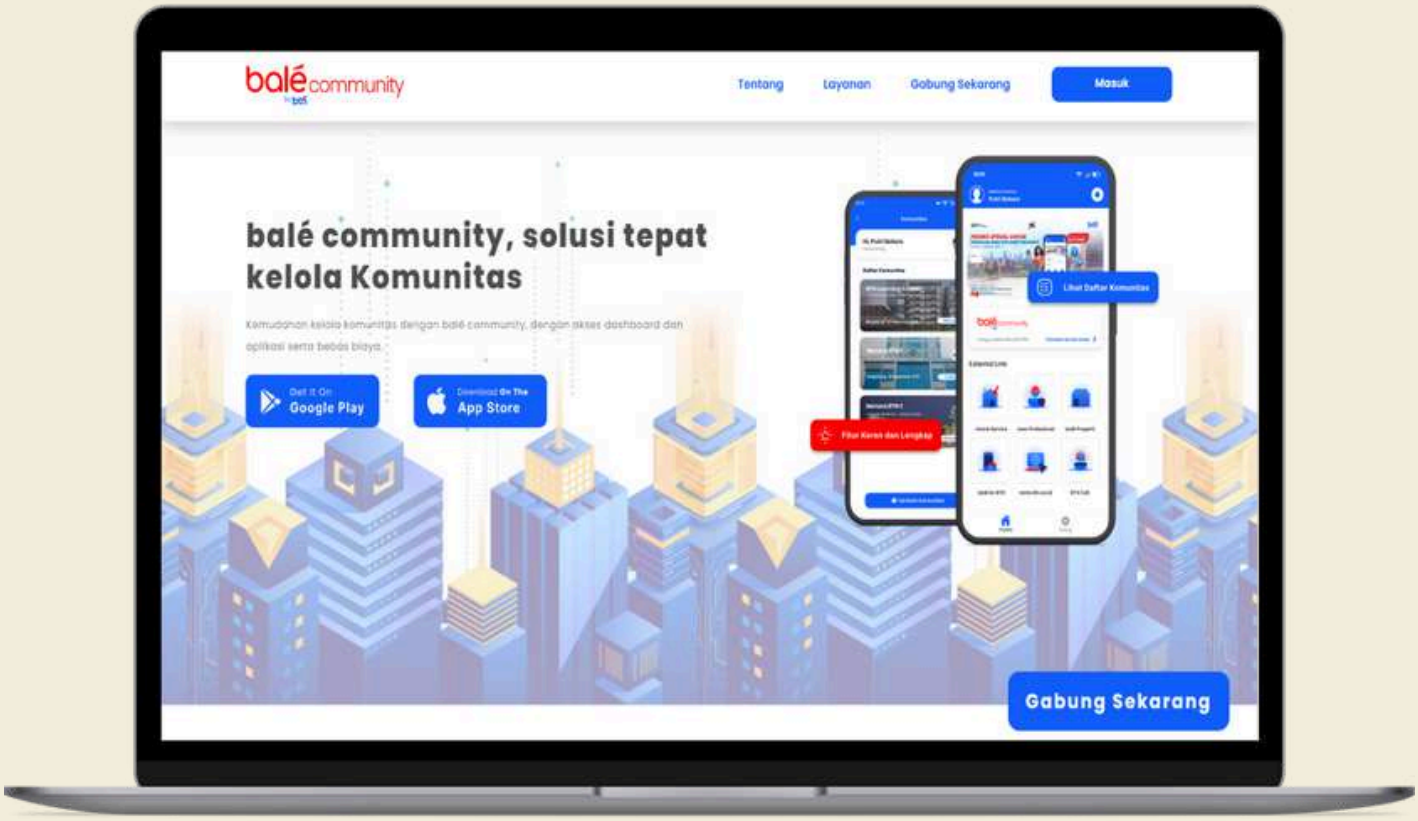
Tech Stack :

- Python, Django, Javascript, JQuery, Tailwindcss, Oracle DB

Freelance Project

BTN - Balé Community

PT. Bank Tabungan Negara



After-sales application offered to BTN debtors to simplify the process for community administrators in managing billing for the communities they oversee.

Key of Contributions :

- Implemented feature enhancements to improve user accessibility and streamline community billing workflows.
- Performed codebase refactoring on legacy modules to enhance application performance, scalability, and maintainability.
- Conducted system maintenance and resolved existing bugs to ensure application stability and reliability in production.
- Collaborated with cross-functional teams to ensure feature alignment with business requirements and user needs.
- Improved overall system efficiency by optimizing existing logic and reducing technical debt.

Tech Stack :

- Javascript, Node.js, MySQL, Redis

Freelance Project

N.A.D.I.A KIOSK SENTUH

PT. Link Net TBK

FirstMedia Self Service Internet Subscription Application

Key of Contributions :

- Built and Developed NADIA SENTUH self-service KIOSK application.
- Integrated the application with internal service APIs, ensuring secure and reliable communication with existing backend systems.
- Performed codebase refactoring on legacy modules to enhance application performance, scalability, and maintainability.
- Designed and implemented a Content Management System (CMS) to manage application content, monitoring, and operational controls.
- Collaborated with internal stakeholders to align application features with business and operational requirements.

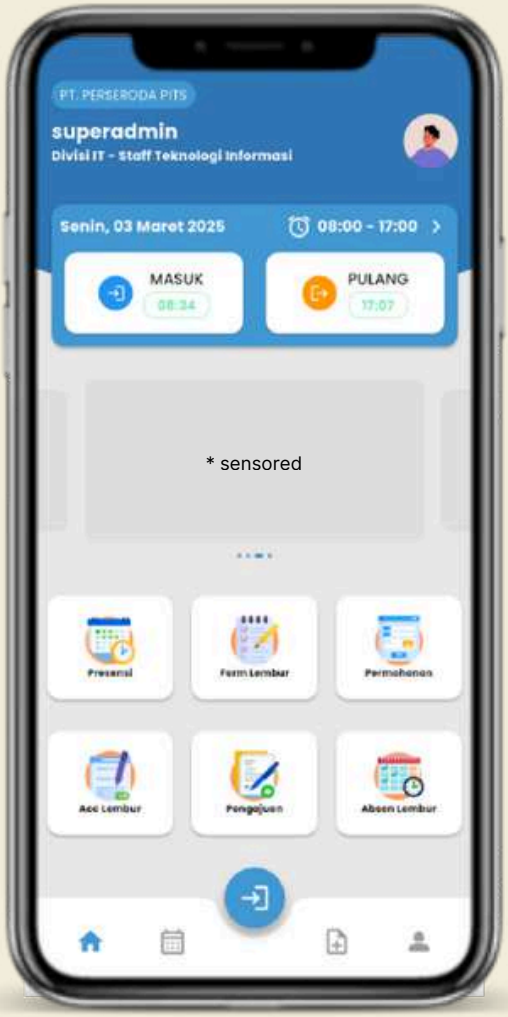
Tech Stack :

- TypeScript, React.js, Electron.js

Freelance Project

Attendance App - PITS

PT. Perseroda PITS



Daily employee attendance application support iOS & Android

Key of Contributions :

- Revamped old design to this new fresh-look application UI.
- Enhancement feature of employee attendance application to manage daily check-in/check-out records, leave management, out-of-town duty attendance and payroll.
- Performed codebase refactoring on legacy modules to enhance application performance, scalability, and maintainability.
- Collaborated with internal stakeholders to align application features with business and operational requirements.

Tech Stack :

- Dart, Flutter, GetX
